## PROFESSIONAL SUMMARY

---

**Flutter & Frontend Developer with 4+ years of experience** in building scalable, cross-platform, and user-centric mobile and web applications. Specialized in **SaaS platforms, restaurant management systems, POS solutions, hardware integrations**, and **real-time communication using MQTT**. Strong ability to deliver optimized and reliable applications with consistent UI/UX across **Android, Web, and Windows builds**.

## TECHNICAL SKILLS

---

**Mobile & Frontend:** Flutter (Mobile/Web/Desktop), AngularJS, HTML, CSS, JavaScript, TypeScript, Bootstrap

**Architecture & State Management:** GetX, BLoC, Provider, MVVM, Component-driven UI development

**Hardware Integrations:** Thermal Printers (ESC/POS), Bluetooth & LAN Printers, Barcode Scanners, Weighing Machines

**Third-Party & Platform Integrations:** Razorpay, Stripe, UPI, Firebase (Auth, Firestore, Messaging), MQTT, REST APIs, GraphQL, Google Maps & Location Services (Geo-fencing, Live Location Tracking, Nearby Alerts)

**Deployment & Build:** Android APK/AAB, Web & Windows Builds, CI/CD Pipeline

**Testing & Optimization:** Unit/Widget/Integration Testing, Offline Caching, Local DB Sync & Performance Tuning

**Tools:** Android Studio, VS Code, Git, GitLab, Postman, Firebase Console, GitHub Copilot, ChatGPT

## PROFESSIONAL EXPERIENCE

---

**Flutter & Frontend Developer**

**May 2022 – Present**

*Accenflair IT Solutions Private Limited, Hyderabad*

Worked on multiple **SaaS and industry-specific platforms**, contributing to **architecture, feature development, and deployment** while collaborating with **backend, QA, and UI/UX teams** to deliver high-quality and scalable solutions across **Android, Web, and Windows**. Focused on **performance optimization, reusable UI components, and CI/CD-driven build delivery** to ensure stability and faster release cycles. Participated in **requirement analysis, sprint planning, and post-release support** to enhance product reliability and customer experience.

## Smart Serve Solutions — Restaurant Management Platform (POS + KDS + Ordering Apps)

*Tech: Flutter, Firebase, MQTT, Razorpay, ESC/POS Printers, REST API*

- Built **POS, KDS, Customer Ordering App, and Waiter App** from scratch.
- Implemented **real-time order sync across departments using MQTT**.
- Enabled offline mode with automatic sync and **multi-printer support**.

## Restomate — Restaurant Ecosystem

*Tech: Flutter, Dart, MQTT, Razorpay, Firebase, ESC/POS Printers, REST API*

- A comprehensive restaurant management ecosystem offering **POS, Self-Ordering Kiosk, QR Menu, and Waiter Apps**.
- Integrated **payment gateways, barcode scanning, weighing machine setup, and Firebase push notifications**.
- Implemented **MQTT-based real-time communication and local caching** for seamless multi-device experience.
- Generated and managed builds across **Android, Web, and Windows platforms**.

## Servu— Appointment & Service Booking SaaS

*Tech: HTML, CSS, Angular, Typescript, REST API, Stripe*

- Developed booking, payment automation, and customer management flows.
- Improved UI responsiveness, caching, and seamless navigation.

## DeskViu— Productivity & Employee Monitoring Software

*Tech: HTML, CSS, Angular, Typescript, REST API, Stripe*

- Implemented attendance sync, leave management, and analytics dashboards.
- Enhanced reporting performance and real-time updates.

## Frontend Developer

**Jan 2021 – April 2022**

*Unisun Marketing Services, Hyderabad*

- Built responsive and scalable web applications using AngularJS.
- Migrated legacy UI into modular component-driven architecture.
- Improved accessibility, performance, and cross-browser compatibility.

## PERSONAL ATTRIBUTES

---

- Strong analytical and debugging skills
- Committed to writing clean, maintainable, and testable code
- Quick learner, adaptable to new technologies
- Effective communicator and collaborative team player
